COURSEWORK

UNDERGRADUATE
Problem Solving Programming
Data Structures and Algorithms
Database Management System
Machine Learning Using Python
Web Designing

SKILLS

PROGRAMMING

- Python : Familiar
- C++ : Familiar
- MySQL : Familiar
- HTML
- CSS
- JavaScript : : Familiar
- PHP : Familiar
- Bootstrap
- jQuery : Familiar
- MS Excel
- MS Word

FRAMEWORKS

- ReactJS : Familiar
- Bootstrap : Familiar

OPERATING SYSTEMS

- Linux/Unix
- Windows
- MacOS

EXPERIENCE

DishTV | CRM Manager
July 2019 – Nov 2019 | New Delhi, India

- Delivered exceptional customer service to every customers
- Hosting a full team of specialized engineers to do the work on time
- Customer issue solving within the TAT(Turn Around Time)
- Implemented and developed customer service process.

IIEC | Redhat Training
Feb 2020

- Working on Mini Projects
- Build a TUI Application

Apr 2020 – May 2020

- Launching a web server using Docker
- Launching Docker Containers
- Creating a mini web app using Joomla in Docker

Tech Table | Campus Manager
Jun 2020 – Aug 2020

- Working with the team
- Creating Survey forms
- Managing students from campus and introducing them about Tech Table and their work.

PROJECTS

VIRTUAL ASSISTANT
Tech Stack: Python

- Created a simple virtual voice based assistant.
- It can send emails to the user just by voice command.
- It can search through the web with voice command.
- It can play music from your computer and change it when saying next or back.
- It tells you date & time
- It tells about the weather.

Apple Website Clone
Tech Stack: [HTML](#), [CSS](#), [Javascript](#)
Framework: [Bootstrap](#)

- Worked on **Bootstrap Studio** and created a copy of the apple website.

Twitter Clone
Tech Stack : [HTML](#), [CSS](#), [Javascript](#)

- Created a simple sample of Twitter on the web
- This web project can tweet your tweets, like it, share it, and also retweet it.
- This project UI was the same as twitter.

Fruit & Vegetable Store Website
Tech Stack : [HTML](#), [CSS](#), [Javascript](#)
Framework : [Bootstrap](#)

- I have created a website that was to showcase the products in the store.
- This website had around 6-8 pages in it.
- Every page contains a different section.
- First page was all in one and then you can open one specific section from the first landing page.
- Last page was to contact the store.

Code Player
Tech Stack : [Javascript](#)

- Created a Code player which converts your HTML code into Javascript & vice versa.

Weather Scraper
Tech Stack : [HTML](#), [CSS](#), [Javascript](#), [Php](#), [MySQL](#), [Google Map API](#)

- Created a simple weather scraper which catches weather from anywhere in the world and tells you about it.
- You can search any city of any country as I have used Google Map API in the project.

Secret Diary
Tech Stack : [HTML](#), [CSS](#), [Javascript](#), [Php](#), [MySQL](#), [Database](#)

- Created a simple online notepad in which you can store your thoughts, story and many more things that you want to write.
- In this project I have created a Login & Logout system which provides a safety to your own diary no one else can use it until you provide your password & id to them.
- Created database connectivity with the notepad so that you can open your document whenever you want and you do not lose anything while writing in it.

HONOURS AND AWARDS

Rank 1550 out of 250368	-	Coding Round Contest: TECHGIG
CSS Level 1 Exam	-	Cambridge Certification Authority
HTML Level 1 Exam	-	Cambridge Certification Authority
JavaScript Level 1 Exam	-	Cambridge Certification Authority
Expertise in Docker	-	IIEC Certification
